DIY BABY MOBILE

YOU WILL NEED: A DIY mobile or plain mobile for this. We purchased a pom pom mobile from amazon and simply removed the majority of the pom poms. You'll also need scissors and all purpose craft glue!

Step 1: Download the file within the membership and print out all of the files onto white card. You'll notice that some pages look duplicated, these are simply mirror images of the birds and flowers so that they can be stuck together and become double sided.

Step 2: Cut out all of the shapes carefully.

Step 3: Take your first piece of string hanging from the mobile and glue one side of a flower to it, then repeat with the other side of the flower so that you sandwich the string between the two pieces and the shapes align perfectly.

Step 4: Repeat with all the birds, bees and flowers, varying your placement as you go along the strings.

Step 5. Hang up the mobile somewhere pretty and you're done!
